

A note about 45 Thompson Street (the building in back of Harry and Vinnie): evidence in records indicates this was built during the summer of 1921. When completed, the porch, window, door and roof trim were painted white. Interior plastering and finishing was done during the winter, with Harry, Vinnie and Muriel moving in the following spring. In the photo below, Will Cressy welcomes the new owners. (Note the snow remaining to the right.).

During the summer of 1922, the window and door trim were painted green, but the eaves remained white until the following year. This helps to identify the dates of many of the photos.

“47 Thompson Street” c 1922
